

Bexcord 8 strand

CONSTRUCTION

Plaited ropes of the BEXCOLINE range are well established in marine and off-shore applications, because of their ease in handling and non-rotating behaviour. They are produced on a plaiting machine containing eight reels, each containing one strand, groups of two reels interweave as a pair around the other pairs of reels to produce an eight strands rope of a somewhat square cross section.

MATERIAL PROPERTIES

Bexcord is our improved, high-strength alternative for Polypropylene. For ropes polypropylene is most often produced as split film. Polypropylene is chemically inert, has a low density (it floats), but has a somewhat lower melting point and lower strength. A special marine finish is applied to further increase the wear resistance in a marine environment. This finish has been tested conform ASTM D6611-00 and is water repellent. Wet and dry strength is identical.

FEATURES

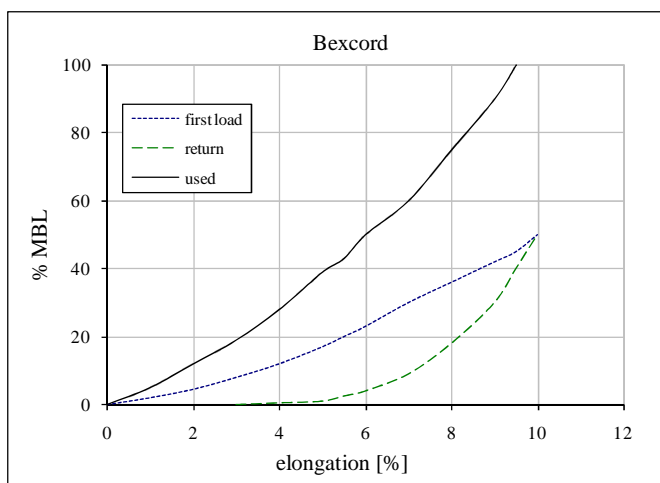

- Material: High tenacity polypropylene
- Construction: 8 strand plaited
- Treatment: Marine finish
- Colour of Rope: White

- Approx. Spec. Density: 0,91 floating
- Melting Point: 165° C
- Abrasion Resistance: Medium
- U.V.resistance: Medium
- Temperature resistance: 70°C max continuous
- Chemical resistance: Good, solvents and strong oxidisers may have a mild effect

- Dry & wet conditions: Wet strength equals dry strength

- Range of use: Fishing, inland shipping, merchant, navy, industry, mooring

Dia mm	Circ. "	Min Break Load		Weight	
		tf	kN	kg/100m	kg/coil
